THE BOOMERANG.

One of the Most Peculiar Weapons of War Ever Invented.

The boomerang is an instrument used both in war and in the chase by the aborigines of Australia. It is usually about two feet in length, made of hard wood bent into a curve resembling an obtuse angle, flat on one side and rounded on the other. The method of using this curious weapon is very peculiar. The thrower takes it in one hand, holding the bent side downward, and huris it forward as if to hit some object twenty or twenty-five yards in advance. Instead of continuing to go directly forward in accordance with the Newtonian law it slowly ascends in the air, whirling round and round, describing a beautiful and geometrical curved line till it reaches a considerable height, when it begins to retrograde, finally sweeping over the head of the projector, striking the object for which it was intended, which is always in the rear.

An English officer has this to say of the singular weapon: "The boomerang is one of the most curious weapons of war ever invented, at least by a barbarous people, nor is it easy to comprehend by what law of projectiles it is made to take the singular directions that it frequently does. I have seen a native throw one so as to make it go forty or fifty yards horizontally and not more than four feet from the ground. It would then suddenly dart into the air to the height of fifty or sixty yards, describe a very considerable curve and finally fall at his feet. In all cases, no matter how thrown, the boomerang keeps turning with great rapidity, like as if on a pivot, making a loud, whizzing noise all the while."

A Young Mother at 70.

"My mother has suddenly been made young at 70. Twenty years of intense suffering from dyspepsia had entirely disabled her, until six months ago, when she began taking Electric Bitters, which have completely cured her and restored the strength and activity she had in the prime of life," writes Mrs. W. L. Gilpatrick of Danforth, Me. Greatest restorative medicine on the globe. Sets Stomach, Liver and Kidneys right, purifies the blood, and cures Malaria, Biliousness and Weakness. Wonderful Nerve Tonic. Price 50c. Guaranteed by Barclay & Grover Drug Store.

Old Time Floggings.

An act of the time of Queen Elizabeth ordained that vagrants were to be "stripped from the middle upward and whipped till the body is bloody." Four-pence each was the recognized charge made by the "whipman" for every male and female vagrant who passed through his hands, but on special occasions this sum was exceeded. Says the constable's account of Great Staughton, Huntingdonshire: "May, 1691.—Paid in charges taking up a distracted woman, watching her and whipping her next day, 8 shillings 6 pence." After whipping people according to the statute the authorities sometimes gave them a letter recommending constables and others "to be as charitable as the law permits."

The Mind's Eye.

It will probably be news to most people to hear that rudimentary traces of a third eye exist among all vertebrates, including man. In the human race the third eye forms part of the pineal gland, a small mass about the size of a pea in almost the very center of the brain. Possibly, therefore, there was more actual truth in the well known expression "the mind's eye" than its originator dreamed of.

A Dispenser.

A street preacher in a west of Scotland town complained to a passing policeman about being annoyed by a part of the audience and asked him to remove the obnoxious ones. "Weel, ye see," replied the cautious officer. "It would be a hard job for me to spot them, but I'll tell ye what I'd dae if I were you." "What would you do?" eagerly inquired the preacher. "Just go round wi' the hat!"

Finance.

Many words of most august sound prove to be of quite commonplace ancestry when traced to their origins. "Finance" is really only "settling up." Literally, it is just "ending" and was formerly used in that very simple sense in the English language. Then it came to signify settling up with a creditor and acquired the special sense of ransom.
